

Compacting conveyor for biogas

The right feeding technology for your biogas plant:

-  Directly through the wall, without long conveying distances
-  Solid stainless steel construction
-  Reliable drive unit
-  Linear transport capacity up to 35 cbm/h
-  Hydraulic injection after the feeding process
-  Supply to places up to 6 m under water
-  Suitable for all solid materials

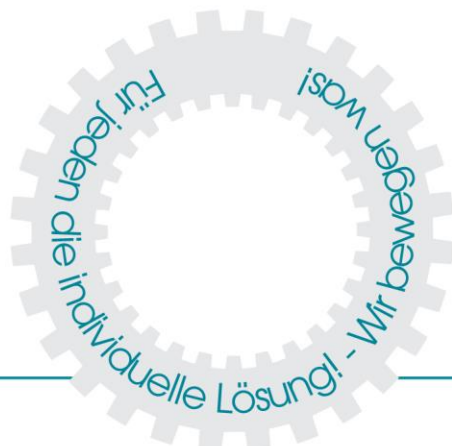

Accessories:

-  Feeding hopper made of stainless steel with feeding rollers up to 10 cbm
-  Slide valve with leak detection
-  Complete control with radio switch
